## Skills

HTML5 | Javascript | ReactJs | Node.Js | CSS3 | Nextjs | Tailwindcss | Bootstrap | Material-UI |  
MySQL | MongoDB | Fullstack development | Python

## Experience / Projects

2023

### Jovix- e-commerce website frontend

The first frontend web app I made. It fetches data from dummy json and displays them on the frontend with their prices and other details of the project. It has the functionality of adding or removing items from the shopping cart. It was developed using reactjs and tailwindcss - [visit Jovix](#)

2024

### Artify- stores users Data

The second full stack website I made which helps the user to insert his data, especially for the movie/songwriters. It helps them to save their data to the database, retrieve data, edit and delete them. It was developed using Reactjs, Tailwind Css, Nodejs and mongodb for the database. - [Visit Artify](#)

### Fashionix - full stack ecommerce website

• **Ongoing**

This is also a full stack website I am working on. It has an admin panel where an admin can go and add products according to their categories. The end-users also get the categories of products (males, females, both gender products) if interested in it, he/she can add it on cart. It saves the favorite and cart products in the database. It was developed using Reactjs, Tailwind Css, Material-UI, MongoDB and Nodejs.

## Education

Rwanda Coding Academy- A2 Diploma

Rwanda

• Software programming and Embedded systems

## **Awards**

1.Won 7th prize national scratch competition - May 2019
